

OMG Orders API User Documentation

v1.0.1

This resource offers an access point for external API clients to get data from OMG platform into its data environment. It provides endpoints to query for orders related to the account whose authorization token is sent along with the request.

Data supplied by these endpoints is grouped by sale code. Records may be filtered by date range and are always paginated, with no option to get a full list of orders to avoid too big responses.

- GET Orders from Specific Sale Codes by Date 2
 - Parameters 2
 - Examples..... 2
 - Single Existing Sale Code..... 2
 - See full sample response 3
 - Multiple Existing Sale Codes..... 6
 - See full sample response 6
 - Nonexistent Sale Code..... 10

 - Invalid Authorization Token..... 15
 - See full sample response 15

GET Orders from Specific Sale Codes by Date

`https://app.ordermygear.com/export/order_api/AAAAA,BBBBB,...?startdate=dddd-dd-dd&enddate=dddd-dd-dd&page=1&limit=10`

Gets orders from specified sale codes related to the account whose authorization token is provided.

Sale codes are provided within the URL, separated by ",".

All query parameters are optional.

| | |
|---------------|--|
| AUTHORIZATION | Bearer Token |
| Token | <p><Token provided by OMG integrations section></p> <p>See the Orders API help center article for more info.</p> |

PARAMETERS

| | | |
|-----------|--------------|--|
| startdate | <dddd-dd-dd> | (Optional) Starting date to search for records |
| enddate | <dddd-dd-dd> | (Optional) Final date to search for records |
| page | 1 | (Optional) Page to fetch. Defaults to "1" when empty or not provided |
| limit | 10 | (Optional) Number of records per result. Defaults to "10" when empty or not provided |

EXAMPLES

Single Existing Sale Code

```
curl --location --request GET
'https://app.ordermygear.com/export/order_api/DEXRV?limit=10&page=1'
```

Response - HTTP 200 OK

See full sample response
