## Copy a Store

You've created a store, made a bunch of sales to your end customers, and fulfilled the items in a timely manner — now it's time to do it all over again! Rather than rebuilding your store from scratch, why not save some time by copying the one you already created? With the **Copy Store** button, you can do just that!

<embed full video tutorial>

## Open store to be copied

- Select the store you wish to copy from your store list
- Once opened, click on the **Copy Store** button

er info:	Yes			\$19.00	adidas Men's Amplifier Long Slee		

- The store will begin to copy this may take a minute if the store has a lot of products!
- Once complete, you will be brought to the new version of the store, which will keep all of the store settings of your original store, including fees, rebates, and coupons

**Pro Tip:** A major benefit of copying a store is starting over fresh with your reports — which means no more confusion on which orders have or have not been fulfilled!

## After the store has been copied

- Click **Edit Store** to adjust the open and close dates, add or remove products, or add a custom URL to the store
- The store will now have "Copy" at the end of the store name we recommend removing this prior to sending to your customers to keep the store looking professional
- **Archive** the previous version of the store so you don't get confused on which is which!

**Pro Tip:** If you're reopening a store but want to let the customer use the same URL, make sure to remove it prior to copying the store, and then paste it into the new version you've just created. This keeps everything consistent from the customer's perspective, even though the store they're seeing is actually brand new. Watch the following video for steps:
